Confined Space Entry – Missing Gas Testing

Observation / Narrative

During maintenance activity, a worker was preparing to enter a confined space. Required gas testing had not been completed before entry. The supervisor identified the issue and stopped the activity. No injury occurred.

Immediate Action Taken

Work was stopped and entry was not permitted until atmospheric testing and the required confined-space controls were verified.

DEMO USE ONLY: Synthetic demonstration report created for testing the PrecurAi prototype. Not an actual OIL incident record.
