Suspended Load Over Personnel

Observation / Narrative

During a lifting operation, a suspended load was being moved through an area where workers were present. The exclusion zone had not been effectively maintained. The lifting activity was stopped before the load passed over the personnel. No injury occurred.

Immediate Action Taken

Lifting was stopped. Personnel were moved outside the lifting zone and the exclusion area and lifting controls were verified before work resumed.

DEMO USE ONLY: Synthetic demonstration report created for testing the PrecurAi prototype. Not an actual OIL incident record.
